

# MEXAR PRE TECHNICAL DATA SHEET

## PRE

## Properties

Mexar Pre is a novel proprietary formulation developed for the preparation of fabrics ready for digital printing of pigment inkjet inks.

Mexar Pre has been optimised to work perfectly with Mexar Tex 1 range of pigment inks.

## Features and Benefits

- • Increased colour density of prints
- • Increased fastness of final finished fabric print
- • No extra handle to fabric
- • Prevention of dot gain
- • Suitable for cellulosic fabrics and blends
- • Non Yellowing
- • Water based non hazardous components

## Directions for Use

Suggested formulation:

Mexar Pre: 300g/Litre

Water: 700g/Litre

Recommended pick up between 70-90% in a padding application  
Dry 110 deg C for 2 mins (or until fabric is dry)

Mexar Pre can also be sprayed onto fabric with the above recipe
